Direct Billing within Health Services

Lori A. Soos, MA,BSN,RN Director of Health Services Niagara University

Learning Objective

- Discuss considerations Institutions of Higher Education (IHE) must consider when implementing direct billing
- Identify methods available for billing
- Discuss the challenges and benefits of direct billing

What We Know:

Growing financial pressures in higher education institutions have forced universities and colleges to seek additional methods in obtaining funding for campus Student Health Centers.

What We Believe:

Implementing a direct party medical billing solution for health services rendered on campus can assist with closing gaps in funding.

Current Challenges within Student Health Services (SHS)

Clinical Challenges

- Increased student needs
- Increase in patient utilization rates
- Higher student/family expectations

Financial Challenges

- Increasing costs to provide current services
- Deceasing financial support from the University

Institutional considerations

University Mission

- Mission statement
- Core values
- Community perception of this mission

Desired Outcome

- Increase revenue to increase services
- Institutional directive
- Decreasing operational budget

Patient Utilization

- Expect decrease in patient visits
- Acuity of current patients
- Provider coverage

Institutional considerations

Student Health Fees

- Do you charge a SHF?
- What is the fee used for?
- Will you eliminate the fee or redirect?
- What other services do you have a fee-for-service?

Organizational Structure

- Integrated health services & counseling services
- Will you bill for both

Institutional Populace

- Instate/outstate
- Residential/commuters
- # international students
- Financial class of families
- Current insurance coverage of students

Institutional considerations

Insurance Carriers

- What is the precedence of carriers in your region or state
- Will they credential SHS?
- Will you be the first?

Institutional Policy

- Health insurance mandates for all students?
- How to you care for un insured/under insured?
- New regulations will affect policy

Current Resources

- Are you supported institutionally?
- Can your staff absorb additional workload?
- Is additional staff needed?
- Can you train current staff?

3 Fee for Service Models

Models of delivery for SHS

- 1) Outsourced/Contracted
 - Long term contracts, typically 3-5 years
 - High up front costs
 - Yearly fees not dependent on revenue generated
 - Loss control of costumer service
- 2) In-house billing with billing clerk in office
 - Short term contract, monthly
 - No to low up front costs
 - Low monthly costs for use of software program
 - Package based on monthly encounters
 - - Perform same functions of vendor (scrub claims, send thru clearing house, check insurance)
 - You control costumer service

Models of delivery for SHS

3) In-house billing with independent contractor

- Small to no upfront costs
- Short term contract, monthly to yearly
- Low monthly costs for use of software program
 - -Package based on monthly encounters
 - - Perform same functions of vendor (scrub claims, send thru clearing house, check insurance)
- Receive portion of revenue collected
- Loss control of costumer service

Challenges

- Conflict with institutional mission
- Lack of community by-in
 - Institutionally, employees, students/parents
- Process change implementation increases staff workload
- Cost and expenses to implement
 - No implementation budget
- Credentialing (90-120 days)
 - Clinic as a whole: NPI, CAQH initially and quarterly
 - Providers/organization with each insurance carrier
- Institutional policy
 - Need to develop policy that supports your mission and objectives

Benefits

- Revenue generating
 - Where does the money go?
 - Will it support your initiatives?
- Keeps services in-house verse outsourcing

SWOT Analysis

<u>Successes</u>	<u>Weaknesses</u>
•Validates Services rendered	Loss of student focus during
•Seen as "real doctors office"	implementation
•Capture revenue for current practices	Lack of staff experience
•Practice optimization	Initial increase of staff workload
•Streamline current processes	Additional staff support
•Interfaces labs, student	Learning curve
convenience with portal	Possible increase in parent/student
•Month to month contract	inquires
•Completes strategic plan	Interfacing issues-no Mental health
	Not a proven model in college health
<u>Opportunities</u>	Not a proven model in college health <u>Threats</u>
Opportunities •Lead by example	
* *	<u>Threats</u>
•Lead by example	<u>Threats</u> •Now seen as revenue generating, loss student
Lead by exampleRevenue generating	<u>Threats</u> •Now seen as revenue generating, loss student focus

Lack of implementation

- Lack of strategic planning
- Failure to be innovative, utilize critical thinking skills
- Stagnate, complacent staff @ clinics
- Afraid to take a risk
- "Watch and See Mentality"
- Unwilling to suggest : changes operations, increases workload & responsibilities
- Lack of capable staff
- No resources to fund third party billing

Utilization of Comprehensive Health Fees

- Services provided by current undergraduate comprehensive fees
 - Student outreach
 - Student education
 - Student wellness programming
 - Student counseling
 - Pre-paid co-payments
 - Must be stated and disclaimed on-line in policy of coverage

*We are not waving the co-payments, we are arranging a pre-paid co-payment that is campus specific
